The Computer Science Minor: Some Nuts-and-Bolts

Courses

There are only five required courses:

- CSC 115 Computer Science I (offered every Fall and Spring)
- CSC 215 Computer Science II (offered every Spring)
- CSC 303 Fundamentals of Data Computing (offered every Fall)
- CSC 324 Web Programming (offered odd Falls)
- ITMR 320 Databases (offered every Spring)

Course prerequisites:

- CSC 215 requires CSC 115.
- CSC 324 requires CSC 115.
- ITMR 320 requires CSC 115 and CSC 215
- CSC 303 can be attempted without having had CSC 115, provided that you have had MAT 111 (not part of this minor) but it is strongly recommended that you take CSC 115 first.

Course Sequencing

It's possible to complete at CSC minor in three years. Here's some ways to do it:

Starting in an Odd Fall (e.g., Fall 2021):

Year/Semester	Fall Semester	Spring Semester
First Year	CSC 115, or free semester	CSC 215
Second Year	CSC 303	ITMR 320
Third Year	CSC 324	Free semester

Starting in an Even Fall (e.g., Fall 2022):

Year/Semester	Fall Semester	Spring Semester
First Year	CSC 115	CSC 215
Second Year	• CSC 324 • CSC 303	ITMR 320

We are a small Department, and usually don't have the resources to offer course by arrangement for students who for some reason did not take a course on time. Be mindful of this, and start on the Computer Science minor as early as you possibly can. Take courses as

early as you can, being especially mindful that CSC 324 is offered only once every two years, in odd Fall semesters.
